

PUBLIC ART COLLECTION

TEXAS TECH UNIVERSITY SYSTEM

The Texas Tech University System seeks to enrich the cultural and intellectual life of its campuses by building and maintaining a unique collection of public art created by leading artists of our time.

The Public Art Program at the Texas Tech University System was initiated by the Board of Regents in 1998 to enliven the campus environments and extend each university's educational mission. The program's funding structure is based on similar percent-for-art programs in the nation.

The Texas Tech University System allocates one percent of the estimated total cost of each new capital project to commission works of art of the highest quality.

The development of the collection is guided by members of the public art committee, which includes faculty, staff, students, alumni, and university and community leaders.

The Texas Tech University System's Public Art Collection has been named one of the top 10 university public art collections in the U.S. by Public Art Review, the leading journal in the field of public art.

With this brochure, we invite you to explore the Texas Tech University System's Public Art Collection!
