

Continue Your Education With Our Cybersecurity Certificate Programs

EDUCATION DESIGNED FOR YOU

Angelo State University wants to recognize your military service and help you maximize your training and career potential.

We offer:

- Convenient online certificates that allow you to study any time, anywhere
- Certificates that complement military occupations and matters of national and international security
- Programs designed to reduce or eliminate out-of-pocket expenses to help you reach your academic goals

CYBERSECURITY CERTIFICATES

ASU now offers courses and certificates in the field of cybersecurity, with a goal of educating workers to protect critical infrastructure, economic interests and personal data in an increasingly networked world. The certificates require four cybersecurity-related courses (12 credit hours) that are available at the undergraduate and graduate levels for both degree-seeking and non-degree-seeking students.

CERTIFICATE PROGRAMS

Our eight-week online courses are designed to help you move quickly through our certificate programs.

UNDERGRADUATE CERTIFICATE

Our Border Security undergraduate certificate program allows you to specialize in cybersecurity. You will complete 12 semester credit hours, or four courses, and must maintain a 2.0 grade point average. If you choose to continue your education upon completion of the program, your credits will go toward your bachelor's degree.

GRADUATE CERTIFICATE

Our Homeland Security graduate certificate program allows you to specialize in cybersecurity at the master's level. You will complete 12 semester credit hours, or four courses, and must maintain a 3.0 grade point average. Credits earned toward a certificate can also be used toward a master's degree if you choose to continue in the 36-credit-hour graduate program.
